WAKING UP TO THE WORLD WHILE HAVING FUN

THE FIRST SCIENCE MAGAZINE FOR 3-6 YEAR-OLDS

The latest addition to the Science & Vie range, this monthly magazine explains science to very young children through engaging stories to read with parents, games, colouring pages, and fun experiments to try at home.

Content that explains the world through the lens of science: an original way of exploring every aspect of the world around our children, because science is everywhere.

Educational material designed for young children, featuring interesting and engaging topics to satisfy their curiosity, with 50 pages of content and fun stickers.

The magazine follows Nano the robot and his animal friends on fun and educational adventures.
For fun and learning!
